Main Activities in 2020

1/ Support, counsel and encouragement for the Village Care Development Agency located in Kyatika village in the Kagadi District, Uganda. Their activities include:

- provision of one warm meal per day, schooling, uniforms & supplies for 90 aids orphans in the school which they run
- a Pass on A Pig Project, which gave 15 family groupings a femail piglet to raise, breed and when the sows piglets were weaned, to pass on two of the litter to other families.
- Vegetable gardening initiative where by family groupings receive seedlings and training to grow vegetables for household health and for trade & sale.
- A growing network of house churches

2/ Support, counsel and encouragement to a similar situation in India which cares for the care and education of 30 children plus other humanitarian activities.

3/ Support and encouragement to homes for men and women at risk in Tajikistan. We have been involved with this team since 2006. We have encouraged them with their cultivation of bees and harvest of honey for sale and with their carpentry shop to build bee hives for sale.

The home for women at risk began in 2014. It is the only such home in that nation of 7 million people. At this time the home accommodates some dozen women and their several children. The women receive literary training plus training in sewing, baking, bee breeding and general life skills.

4/ Support & encouragement for a team working with Afghan refugees. Several years back Saqib Munawar in Lahore, Pakistan translated a little book into Urdu that we wrote to encourage simple, organic churches called the Luke 10 Manual. This year he and a team have begun to work with Afghan refugees living in their area of Pakistan.

Stichting Harvest Now pays no salaries or travel costs. Since 2012 the directors of Harvest Now have provided all administrative and travel costs from their own resources.
